Figure 3: DataFrame outputs

```
  Project Id Project Name      Country Project Manager     Domain Technical Architect Audit Status
0   ZXY00001      PRJ_001        India        Jayesh P    Banking              Ruby V      Pending
1   ZXY00002      PRJ_002        India          Mukund  Insurance         Shreyansh N    Completed
2   ZXY00003      PRJ_003  Switzerland       Radhika M  Insurance           Jigisha P    Completed
3   ZXY00004      PRJ_004       Canada          Mukund   Commerce           Saurabh S      Pending
4   ZXY00005      PRJ_005  Switzerland       Radhika M    Banking           Approva S      Pending
5   ZXY00006      PRJ_006  Switzerland       Radhika M    Banking         Shreyansh N      Pending
6   ZXY00007      PRJ_007  Switzerland       Radhika M  Aerospace              Aish P      Pending
7   ZXY00008      PRJ_008        India       Radhika M  Aerospace            Ramesh N      Pending
8   ZXY00009      PRJ_009        India        Jayesh P   Commerce            Ashish B    Completed
9   ZXY00010      PRJ_010       Canada        Jayesh P   Commerce           Jigisha P    Completed
```

Figure 4: Merged data set

Next, let's merge the data of both Excel files based on the project ID. Merge the DataFrame with a database-style join on columns or indexes:

```
1. resultData = pd.merge(projectData, auditStatus,
   how='left')
2. print(resultData)
```

Figure 4 shows the merged data set.

Now if you want to merge specific columns of specific DataFrames, type:

```
1. resultData = pd.merge(projectData[["Project Id","Project
Name","Project Manager"]], auditStatus, how='left')
```

The result is given in Table 2.

Project ID	Project name	Project manager	Audit status
ZXY00001	PRJ_001	Jayesh P	Pending
ZXY00002	PRJ_002	Mukund	Completed
ZXY00003	PRJ_003	Radhika M	Completed
ZXY00004	PRJ_004	Mukund	Pending
ZXY00005	PRJ_005	Radhika M	Pending
ZXY00006	PRJ_006	Radhika M	Pending
ZXY00007	PRJ_007	Radhika M	Pending
ZXY00008	PRJ_008	Radhika M	Pending
ZXY00009	PRJ_009	Jayesh P	Completed
ZXY00010	PRJ_010	Jayesh P	Completed

Table 2: Data with specific columns
