The author has a keen interest in network security, open source cloud platforms and Linux internals.

So, is that all?

Well, we have not even scratched the surface of Snort. For the geeks out there, think of this as just the beginning to a Christopher Nolan or a Quentin Tarantino movie — it still has many layers to go through. We can write our own rules, create our own NIDS for the enterprise and even sniff packets. **END** 🐧
