

DVD OF THE MONTH

Linux for the desktop.

SparkyLinux 5.10

SparkyLinux is a GNU/Linux distribution created on top of the Debian GNU/Linux operating system. Sparky 5.10 Nibiru is a fast, lightweight and fully customisable OS that comes with Firefox-ESR (ARMHF) and the Linux kernel 4.19.67-2+deb10u1 LTS (PC).

PureOS 9.0

This is a user-friendly, secure and freedom-respecting OS for daily use. With PureOS, you are the only one in control of your digital life. Whether you are a technology enthusiast, someone looking to protect the digital life of your family, or from an enterprise's IT/security department, you can use PureOS freely for any purpose, study and share its source code, and adapt it to your needs. You can find the ISO image of the distribution in the *other_isos* folder of the bundled DVD.

Sabayon Linux 19.03 (Fluxbox edition)

Sabayon is a beginner-friendly Gentoo based open source Linux distribution. Its aim is to deliver the best out-of-the-box user experience by providing the latest open source technologies in an elegant format. The bundled Fluxbox edition has a stacking window manager for the X Window System. Its user interface has only a taskbar, a pop-up menu accessible by right-clicking on the desktop, and minimal support for graphical icons. You can find the ISO image of the distribution in the *other_isos* folder on the bundled DVD.

What is a live DVD?

A live CD/DVD or live disk contains a bootable operating system, the core program of any computer, which is designed to run all your programs and manage all your hardware and software.

Live CDs/DVDs have the capability to run a complete, modern OS on a computer even without secondary storage, such as a hard disk drive. The CD/DVD directly runs the OS and other applications from the DVD drive itself. Thus, a live disk allows you to try the OS before you install it, without erasing or installing anything on your current system. Such disks are used to demonstrate features or try out a release. They are also used for testing hardware functionality, before actual installation. To run a live DVD, you need to boot your computer using the disk in the ROM drive. To know how to set a boot device in BIOS, please refer to the hardware documentation for your computer/laptop.
