

you. Prices mentioned below are for a pack of two and may vary on different e-commerce websites.

Tenda Nova MW3: This is a 1200Mbps dual-band distribution mesh Wi-Fi system designed to cover an area of 93sqm to 140sqm (1000sqft to 1500sqft) per unit. The 2.4GHz frequency band offers a throughput of up to 300Mbps, whereas the 5GHz band offers up to 867Mbps. There are two Ethernet ports per mesh node. One acts as WAN and the other as LAN on the primary mesh node, whereas both act as LAN on additional nodes.

₹ 7,199

2x2 MU-MIMO technology keeps more than fifty devices well-connected simultaneously. Tenda Wi-Fi app provides features such as parental control, guest network management, online firmware upgrade and so on. The device is priced at ₹ 7199.

D-Link COVR-C1202: This 1200Mbps dual-band distribution mesh Wi-Fi system is designed to cover an area of 232sqm (2500sqft), including dead zones. The 2.4GHz frequency band offers a throughput of up to 300Mbps, and the 5GHz band offers up to 866Mbps. There are two Ethernet LAN ports per unit for wired connectivity.

₹ 10,999

MU-MIMO technology connects multiple devices simultaneously to create an efficient network. The one-

touch Wi-Fi-protected setup WPS button establishes an instant connection to smart home devices. D-Link Wi-Fi app allows easy setup and management. Additional features include parental control, auto-configuration and QoS support. The device can also work with your existing router, and is available for ₹ 10,999.

Netgear Orbi RBK20W-100NAS: This is a 2200Mbps (866+866+400Mbps) tri-band distribution mesh Wi-Fi system designed to cover an area of 250sqm. It offers wired connectivity and constant speed even on the addition of multiple devices. There are two Ethernet ports per node; one acts as WAN and the other as LAN on the primary mesh node. Both ports act as LAN on additional nodes.

₹ 15,900

MU-MIMO technology allows for simultaneous data streaming. Orbi app provides easy installation and setup. Additional features include smart parental controls, guest network management and device status check. For voice control, the router is compatible with Amazon Alexa/Echo and Google Assistant. It can connect to your existing modem, and is available for ₹ 15,900.

TP-Link Deco M4: This is a 1200Mbps mesh Wi-Fi system designed to cover an area up to 260sqm. The 2.4GHz frequency band offers a throughput of up to 300Mbps, and the 5GHz band offers up to 867Mbps. There are two Ethernet ports per unit that may work as WAN or LAN through auto-sensing.

₹ 8,934

MU-MIMO technology keeps up to hundred devices well-connected simultaneously. Deco app provides features such as device prioritisation, setting up of the guest network and so on. The router has QoS support and works with IFTTT as well as Alexa. It is compatible with every other Deco model, and can be bought for ₹ 8934.

Linksys WHW0102 Velop: This 1300Mbps dual-band distribution mesh Wi-Fi system is designed to cover an area of 279sqm (3000sqft). The 2.4GHz frequency band offers a throughput of up to 400Mbps, and the 5GHz band offers up to 867Mbps. There are two auto-sensing Ethernet ports per node. The self-healing feature ensures that the other nodes keep working even if one of them is unplugged.

₹ 13,766

MU-MIMO technology keeps multiple devices well connected simultaneously. Linksys app provides features such as parental control, guest network management, auto-fixing a node and device prioritisation. The device is compatible with Alexa, and is priced at ₹ 13,766. **END** 🐧
