

CONTENTS

JULY 2020 | ISSN-2456-4885

FOR U & ME

- 18** Modular Open Source Identity Platform (MOSIP): A Home-Grown Digital System for the World
- 22** A List of Linux Shells to Choose From
- 28** Is Learning from AI Flop-Shows a Good Idea?

FOCUS

- 44** Public Blockchains vs Private Blockchains: How and When to Use Them
- 50** A Brief Introduction to HydraChain, a Popular Distributed Ledger System
- 54** IPFS: A Decentralised Cloud and File System for the Blockchain Environment
- 57** Building a Blockchain in the R Language
- 63** How is a Blockchain Helpful in a Pandemic?

DEVELOPERS

- 71** BeeWare and Kivy: Python Tools for Building Cross-Platform Apps
- 75** Using Flutter for Cross-Platform Mobile Application Development
- 78** Natural Language Processing Simplified
- 82** Neural Network Preceptors: How Deep Learning can Help Solve AI Problems

COLUMNS

- 66** CodeSport

ADMIN

- 84** Kerberos: The Trusted Watchdog of Distributed Computing
- 86** Install WordPress from Scratch on a Server Using LEMP
- 92** Efficient Log Management with Fluent Bit
- 96** Wfuzz: Protect Your Web Application by Finding the Faults In It

OPEN GURU

- 101** Data Analytics with Pandas: An Introduction

42

How Blockchain is Aiding the Software Development Industry

14

"If you are a techie, your home page should be GitHub, not Instagram" –Vinit Shahdeo

16

"Currently, digital trust is at the place that open source was in the 90s" –Satish Mohan
