

Figure 4: Dart plugin installation as a prerequisite for Flutter

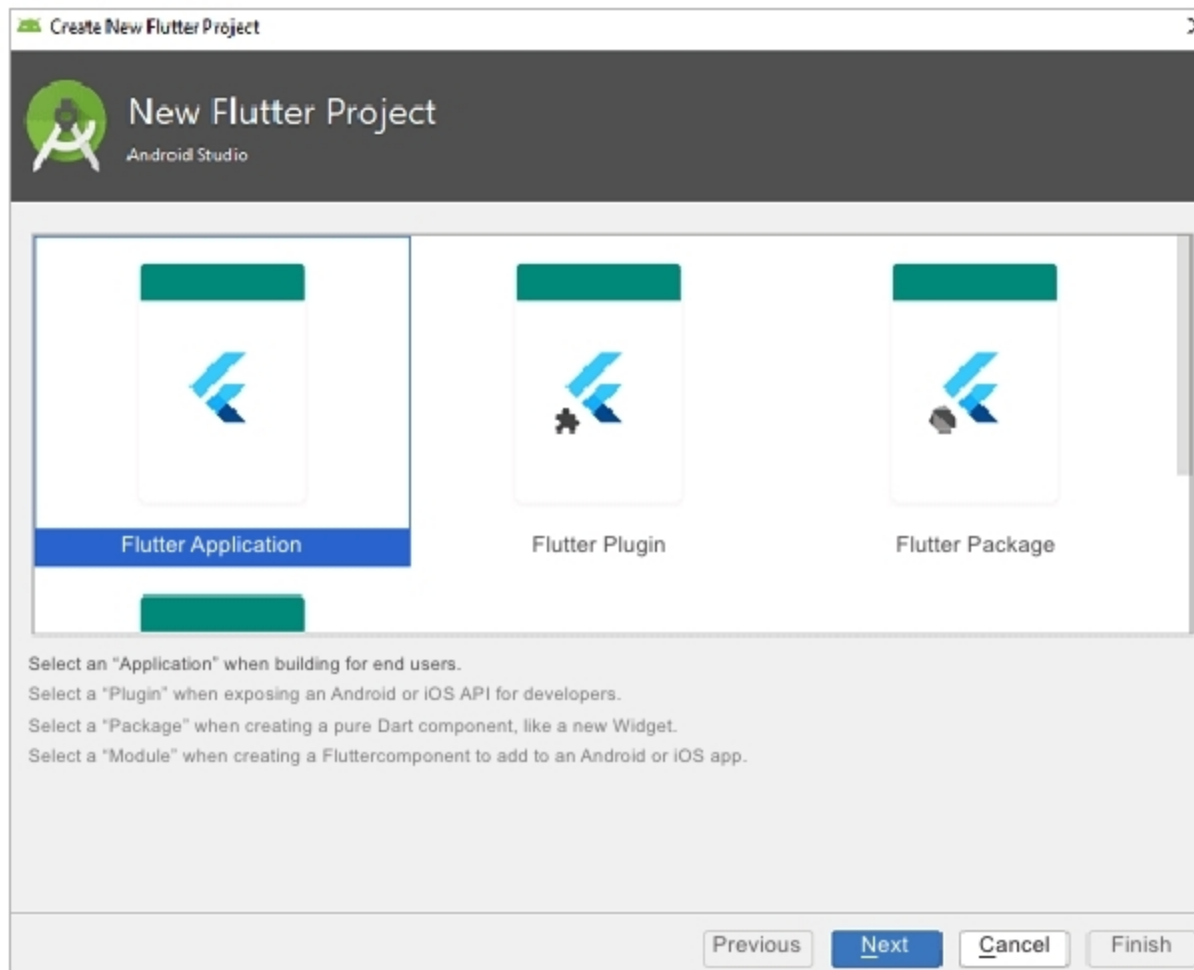

Figure 5: Create a new Flutter project in Android Studio IDE

other mobile app development frameworks as it provides smoother and seamless scrolling experiences.

- It reduces development as well as testing efforts as it is a cross-platform framework. So it eliminates the need for testing applications on different platforms.
- There is no need to update the UI content manually, like in the case of reactive frameworks.
- The cross-platform application development nature of Flutter makes it suitable for MVP (Minimum Viable Product). **END** 🐧
