

“Leadership never looks like it does in the movies; especially in a consensus-driven open source project”

Instaclustr is an open source Software-as-a-Service company. It operates an automated, management environment and provides databases, analytics, search and messaging. Its managed environment is delivered through cloud providers like AWS, Azure, and GCP. **Ben Bromhead**, *chief technology officer* and *co-founder* at **Instaclustr**, in an exclusive interaction with **Sreejani Bhattacharyya** of **OSFY**, talks about the Apache Cassandra community and also discusses how to lead and manage a community. Here are some interesting excerpts from this conversation.
