Top certifications for mobile app developers

Employers who hire app developers look for candidates with experience in creating apps, especially customer-facing apps. They often want candidates with a wide array of knowledge about various programming concepts and languages, such as application programming interfaces (APIs), user experience (UX) design, Python, C#, PHP, JavaScript, HTML/CSS and Swift.

Employers also tend to prefer or require a bachelor's degree in computer science or some related field. But because mobile app developers are in high demand, some employers train (or pay a third party to train) candidates with a background in a related IT area, such as networking or engineering. They may even train experienced developers on other mobile app development tools and platforms. Although mobile app development certifications are not widely requested by hirers, a certification can get your resume noticed, prove that you deserve a promotion and help you get a decent salary.

Some of these certifications are listed below.

1. Google Developers Certification - Associate Android Developer: <https://developers.google.com/certification/associate-android-developer>
2. Google Developers Certification - Mobile Web Specialist: <https://developers.google.com/certification/mobile-web-specialist>
3. GIAC Mobile Device Security Analyst (GMOB): <https://www.giac.org/certification/mobile-device-security-analyst-gmob>
4. Microsoft Certified Solutions Developer (MCSD): App Builder: <https://www.microsoft.com/en-us/learning/mcsd-app-builder-certification.aspx>
5. Microsoft Technology Associate (MTA): <https://www.microsoft.com/en-us/learning/mta-summary-certification.aspx>
6. Salesforce Platform App Builder Certification: <https://focusonforce.com/salesforce-certifications/platform-app-builder/>
7. Salesforce Platform Developer 1 Certification: <https://focusonforce.com/salesforce-certifications/platform-developer-1/>
8. Salesforce Platform Developer 2 Certification: <https://focusonforce.com/salesforce-certifications/platform-developer-2/>
9. ATC Android Certified Application Developer: <https://androidatc.com/pages/Eng/Android-Certified-Application-Developer>

12. IBM Certified Mobile Application Developer - Mobile Foundation V 8.0: <https://www.ibm.com/certify/cert?id=C0000200>
13. Oracle Certified Professional (OCP) - Java Development: <https://academy.oracle.com/en/resources-oracle-certifications.html>

Top resources for learning mobile app development

According to Payscale's Survey, the estimated salary for an app developer is set to reach around US\$ 68,000 annually. As an app developer, you will have the following responsibilities:

- Develop and design the app as per end user demands
- Be responsible for fixing Android/iOS bugs, as well as for updates and releases
- Develop the application module design, and do coding and testing
- Assist the technical/product support teams online, and ensure security of the app

Here is a list of the best online courses for budding app developers.

1. UDEMY: <https://www.udemy.com/courses/development/mobile-apps/>
