

has dual 1440×1600 RGB LCDs that provide fifty per cent more sub-pixels than OLEDs, resulting in greater sharpness for the same rendering cost. In addition, the fill factor is three times better than OLEDs, greatly reducing the screen door effect.

It runs at 120Hz with full back compatibility to 90Hz, as well as an experimental 144Hz mode. Higher frame rates improve realism and optical comfort, allowing longer and more comfortable play sessions. Display of the device reduces illumination period of 0.330ms to 0.530ms (frame rate dependent), allowing imagery to remain just as sharp when your head is in motion as when you are standing still. This is a 5x improvement over first-generation PC VR HMDs.

Price: ₹ 71,987

Sony PlayStation VR: PlayStation (PS) VR is the latest member of the PS4 family, so whichever PS4 console you own, you are PS VR ready. Just connect the headset to PS4, add a PS camera and leave reality behind. It has a 14.5cm (5.7-inch) OLED screen that offers hyper-real 3D environments, and is furnished with 360-degree

vision. So whichever way you turn the 360-degree immersion of PS VR you are part of a living, breathing world with a seamless field-of-view.

You get a new dimension in sound with cutting-edge 3D audio that lets you accurately perceive direction and distance of sounds that are coming from above, below and around you. PS camera has dual lenses and 3D depth sensors using which it tracks the position of the headset. There are nine LEDs positioned on the front, back and sides of the PS VR headset that are tracked by PS camera, ensuring pinpoint accuracy within the game world, wherever you are in the room.

Price: ₹ 28,490 bundled with camera

HTC VIVE Pro VR headset: This headset has high-resolution

AMOLED screens with super-rich colours and contrast, which bring imagination to life, claims HTC. The headset is optimised for ergonomic comfort, and weight is evenly distributed to achieve a balanced centre of gravity. VIVE Pro is ideal for extended sessions in VR. It is fully immersive, too.

VIVEPORT subscription is included with the product. You can enjoy up to thirty games during your free trial. Note that VIVE Pro HMD does not include controllers, base stations or VIVE wireless adaptor.

Price: ₹ 72,779

Oculus Rift S: This headset has enhanced optics that offer bright, vivid colours and reduced screen-door effect. Advanced hardware works with Oculus software innovations to render smooth

gameplay on a wide range of PCs. Rift S stays securely and comfortably in place with a quick twist of the fit wheel, so it can take—or double take—your fastest reactions. It delivers stunning graphics and heart-pounding gameplay with easy setup.

Price: ₹ 28,755

Google Daydream View (mobile VR): Daydream is a mobile VR platform that offers high-quality, affordable VR based on Android. It enables an immersive VR experiences by using advanced techniques to predict orientation of your head, increase comfort and reduce motion blur. Daydream's easy-to-wear headset

and expressive controller make it great for longer and more immersive VR experiences.
