

DVD OF THE MONTH

Check out these popular open source server and desktop software.

PCLinuxOS MATE 2019.09 (live bootable)

PCLinuxOS is a user-friendly Linux distribution with out-of-the-box support for many popular graphics and sound cards, as well as other peripheral devices. It comes with a complete Internet suite for surfing the Net, sending and receiving email, instant messaging, blogging, tweeting, and watching online video. The bundled live DVD comes with the standard complement of MATE applications plus LibreOffice, along with Firefox, Thunderbird, the Strawberry music player and the VLC video player.

CentOS LiveKDE (1908)

CentOS is a Linux distribution that provides a free, community-supported computing platform that is compatible with its upstream source, Red Hat Enterprise Linux. You can find the image file in the *other_isos* directory.

ReactOS 0.4.12

Imagine running your favourite Windows applications and drivers in an open source environment that you can trust. That's ReactOS, which is not just an open but also a free operating system. ReactOS is for amd64/i686 personal computers intended to be binary-compatible with computer programs and device drivers made for Windows Server 2003.

What is a live DVD?

A live CD/DVD or live disk contains a bootable operating system, the core program of any computer, which is designed to run all your programs and manage all your hardware and software.

Live CDs/DVDs have the ability to run a complete, modern OS on a computer even without secondary storage, such as a hard disk drive. The CD/DVD directly runs the OS and other applications from the DVD drive itself. Thus, a live disk allows you to try the OS before you install it, without erasing or installing anything on your current system. Such disks are used to demonstrate features or try out a release. They are also used for testing hardware functionality, before actual installation. To run a live DVD, you need to boot your computer using the disk in the ROM drive. To know how to set a boot device in BIOS, please refer to the hardware documentation for your computer/laptop.
