

The Liquid Software Company

SOFTWARE IN THE FAST LANE

JFrog's solution is a fully automated pipeline for distributing trusted software releases. It connects all developers and DevOps engineers to end devices and ensures software flows quickly and free from interruption. Available as on-prem, cloud or hybrid solution.

UPDATING THE SOFTWARE THAT RUNS THE WORLD

JFrog is the global standard for shipping high-quality software continuously and efficiently. With more than 5,000 customers and a community of more than three million developers across the world, it's no surprise JFrog is making waves in the software industry.
