October 2019 witnessed a mega open source event – the 16th edition of the annual, much-awaited Open Source India (OSI). The iconic convention was held on October 17 and 18, 2019, at NIMHANS Convention Center, Bengaluru. It featured packed sessions by over 95 speakers and 16 workshops running in parallel, over two days.

The 16th edition of Open Source India was attended by a large number of open source supporters from India and around the globe. Apart from the talks by experts, the event is also an occasion for exhibitors to showcase their various community-centric offerings to thousands of attendees.

This year, Open Source India had eight different conference tracks and 16 workshops that focused on cutting-edge technologies. And these were attended by a record-breaking audience that ranged from CIOs, tech heads and evangelists, to academicians.

Here is a pictorial round-up for those who missed the event.
