

## IOTA and Linux Foundation join forces to improve the LF Edge framework

IOTA Foundation, a non-profit focused on distributed ledger technology (DLT) and open source ecosystem development, has joined the Linux Foundation to integrate IOTA into LF Edge, Linux's platform for edge computing.

IOTA is the first open source distributed ledger that is being built to power the future of the Internet of Things (IoT) with feeless micro-transactions and data integrity for machines.

"We have joined the Linux Foundation to help complete their stack of technologies to advance the development of a truly interoperable solution set for IoT, the edge and cloud integration," wrote Mathew Yarger, public sector product owner at the IOTA Foundation, in a blog post.

Initially, the IOTA Foundation's focus will be on integration into EdgeX Foundry, where it will

be working with other members to show the power of the IOTA protocol to secure, scale and increase interoperability in the edge and fog areas of the stack. EdgeX Foundry is focused on the Industrial IoT Edge.

Arpit Joshipura, general manager, networking, edge and IoT, the Linux Foundation, commented: "We're excited to be integrating more closely with the IOTA Foundation and are eager to further open innovation, leveraging the unique capabilities that IOTA brings to the LF Edge table."

## MG Motor announces developer programme and grant in India

MG Motor India has introduced its MG Developer Programme and Grant. Launched in collaboration with leading technology companies such as SAP, Cognizant, Adobe, Airtel, TomTom and Unlimit, the initiative is aimed at incentivising Indian innovators and developers to build futuristic mobility applications and experiences. The programme also brings in TiE, Delhi-NCR as the ecosystem partner.

Rajeev Chaba, president and MD, MG Motor India, said, "The automobile industry is currently witnessing sweeping transformations in the space of connected, electric and shared mobility. MG aims to take this revolution forward with its focus on attaining technological leadership in the automotive

industry. We have partnered with leading tech giants to enable startups to build innovative applications that would create unique experiences for customers across the entire automotive ecosystem. More partners are likely to join the programme in due course."

The company is encouraging developers to send in their ideas to the MG India Team. During the course of the programme, selected ideas will get access to resources from the likes of Airtel, SAP, Adobe, Unlimit and Cognizant.

As part of the programme, MG Motor India will provide innovators with the opportunity to secure mentorship and funding from industry leaders. Shortlisted ideas will receive specialised, high-level mentoring and networking opportunities to assist with the practical development of the solution, business plan and modelling, testing facilities, go-to-market strategies, etc. Winning ideas will also have access to a grant, the amount of which will be decided by the jury, on a case-to-case basis.
