Figure 1: List of frequently used keyboard shortcuts

Tile windows

The windows can be tiled in different ways using the shortcuts given below.

Key combination	Action
Super + left arrow	Tiles the current window to the left half of the screen.
Super + right arrow	Tiles the current window to the right half of the screen.
Super + up arrow	Tiles the current window to the top half of the screen.
Super + down arrow	Tiles the current window to the bottom half of the screen.

Browser shortcuts

The most frequently used shortcuts for browsers are listed here. Most of the shortcuts are common to the Chrome/Firefox browsers.

Key combination	Action
Ctrl + T	Opens a new tab.
Ctrl + Shift + T	Opens the most recently closed tab.
Ctrl + D	Adds a new bookmark.
Ctrl + W	Closes the browser tab.
Alt + D	Positions the cursor in the browser's address bar.

F5 or Ctrl-R	Refreshes a page.
Ctrl + Shift + Del	Clears private data and history.
Ctrl + N	Opens a new window.
Home	Scrolls to the top of the page.
End	Scrolls to the bottom of the page.
Ctrl + J	Opens the <i>Downloads</i> folder (in Chrome).
F11	Full-screen view (toggle effect).

Terminal shortcuts

Here is a list of terminal shortcuts.

Key combination	Action
Ctrl + R	Searches history based on the entered text.
Ctrl + A	Moves the cursor to the beginning of the line.
Ctrl + E	Moves the cursor to the end of the line.
Ctrl + U	Deletes the entire current line.
Ctrl + L	Clears the output of a command in the terminal.
Ctrl + K	Deletes all text to the right of the cursor.

You can also configure your own custom shortcuts in Ubuntu, as follows:

- Click on *Settings* in Ubuntu Dash.
- Select the *Devices* tab in the left menu of the *Settings* window.
- Select the *Keyboard* tab in the *Devices* menu.
- The '+' button is displayed at the bottom of the right panel. Click on the '+' sign to open the custom shortcut dialogue box and configure a new shortcut.

Learning three shortcuts mentioned in this article can save a lot of time and make you more productive. **END** 🐧
