

CONTENTS

SEPTEMBER 2019 | ISSN-2456-4885

DEVELOPERS

- 24** Debugging in Emacs: The Grand Unified Debugger
- 27** The Protocols That Help Things to Communicate Over the Internet
- 32** Deep Learning Based Chatbots are Smarter
- 34** Machine Learning (ML) and IoT can Work Together to Improve Lives
- 38** Understanding Joins in Hadoop
- 43** XMPP: A Communication Protocol for the IoT
- 45** DeviceHive: The Scalable Open Source M2M Development Platform
- 48** The Emacs Series ht.el: The Hash Table Library for Emacs
- 52** Cloud Native Computing: The Hidden Force behind Swift App Development

ADMIN

- 55** Communication and Internet Technology: About Interconnecting Networks
- 60** Simulating Smart Cities with CupCarbon
- 66** Cacao: A Lightweight Online Tool for Modelling AWS Architecture
- 70** How to Run Multiple Services Inside a Single Container Using Supervisord
- 72** Transition to Nftables

FOR U & ME

- 83** FOSS in India: Perspectives of an American Anthropologist
- 90** The Five Most Popular Operating Systems for the Internet of Things
- 93** The Role of Open Source Tools and Concepts in IoT Security
- 97** AI and the IoT: Leveraging Digital Disruption

OPENGURUS

- 100** The Emergence of Edge Analytics in the IoT Ecosystem
- 102** A Primer on Open Source IoT Middleware for the Integration of Enterprise Applications

COLUMNS

- 22** CodeSport
- 53** Exploring Software: Bringing Some Order into a Collection of Photographs
