

Microsoft Certified: Azure Administrator Associate

As a cloud administrator, your responsibility is to implement, manage, monitor and govern resources such as compute, storage and network. The AZ-104 certification helps you to understand how to manage and monitor resources in the Microsoft Azure environment.

Registration fees	₹ 4800 (India)/US\$ 165 (USA) [price is based on currency exchange rates in various nations and regions]
Prerequisites	• Azure Fundamentals Part 1: Describe core Azure concepts • Azure Fundamentals Part 2: Describe core Azure services • Azure Fundamentals Part 3: Describe core solutions and management tools on Azure • Azure Fundamentals Part 4: Describe general security and network security features • Azure Fundamentals Part 5: Describe identity, governance, privacy, and compliance features • Azure Fundamentals Part 6: Describe Azure cost management and service level agreements • Prerequisites for Azure administrators Visit https://docs.microsoft.com/en-us/learn/paths/az-104-administrator-prerequisites/ for more details.
Questions and format	40-60 questions • Multiple choice questions • Build list in sequence • Drag and drop • Hot area • Repeated answers • Short answers • Labs (As stated under the earlier certification, I was not asked to carry out any lab work for the four certifications I studied for from my home.)
Duration	180 minutes exam time / 210 minutes seat time (associate and expert job role exams); 150 minutes exam time / 170 minutes seat time (associate and expert job role exams that contain labs)
Passing score	700/1000 (scaled score) The real percentage of questions that a candidate must answer correctly differs from exam to exam.
Medium of delivery	Online from your home or an authorised test centre
Open book	No
Exam content and objectives	• Manage Azure identities and governance (manage Azure AD objects, manage role based access control, manage subscriptions and governance); https://docs.microsoft.com/en-us/learn/paths/az-104-manage-identities-governance/ • Implement and manage storage, manage storage accounts, manage data in Azure Storage, configure Azure files and Azure blob storage; https://docs.microsoft.com/en-us/learn/paths/az-104-manage-storage/ • Deploy and manage Azure compute resources (configure VMs for high availability and scalability, automate deployment and configuration of VMs, create and configure VMs, create and configure containers, create and configure Web apps); https://docs.microsoft.com/en-us/learn/paths/az-104-manage-compute-resources/ • Configure and manage virtual networking (implement and manage virtual networking, configure name resolution, secure access to virtual networks, configure load balancing, monitor and troubleshoot virtual networking, integrate an on-premises network with an Azure virtual network); https://docs.microsoft.com/en-us/learn/paths/az-104-manage-virtual-networks/ • Monitor and back up Azure resources (monitor resources by using Azure Monitor, implement backup and recovery); https://docs.microsoft.com/en-us/learn/paths/az-104-monitor-backup-resources/
Good reference books	Exam Ref AZ-104 Microsoft Azure Administrator; https://www.amazon.in/Exam-AZ-104-Microsoft-Azure-Administrator/dp/0136805388 Microsoft Azure Administrator Exam Prep (AZ-104); https://www.amazon.in/Microsoft-Azure-Administrator-Exam-AZ-104/dp/9389898765
Benefits	It creates awareness on what needs to be improved with respect to managing resources effectively in Microsoft Azure.
Free training	Yes
Schedule your exam	https://docs.microsoft.com/en-us/learn/certifications/azure-administrator/
My view	AZ-104 is a good platform to learn the basics of administering Azure resources, and know about Azure AD as well as role based access.
