

Want to Buy Cryptocurrencies? Use These Wallets

Cryptocurrencies are getting entrenched in the global financial system slowly and steadily, with certain companies using these to pay their employees too. Hesitancy with respect to their use is slowly ebbing, and you may run the risk of being behind the times if you don't stay updated on the latest trends in this domain. This article lists the exchanges and wallets you should be aware of in case you want to buy or trade in cryptocurrencies.

Blockchains are riding on a wave of popularity today. Businesses are closely monitoring blockchain development platforms to ensure that this secure environment can be used for a variety of applications. Governments, too, are looking at employing blockchain technologies to harness their benefits.

Key applications of blockchains on which there is considerable research and development are:

- Cryptocurrencies and cross-border digital payments
- E-governance
- Smart cities
- Real-time Internet of Things (IoT) for smart appliances
- Supply chain and logistics management
- Smart contracts
- Electronic health records (EHR)
- Intellectual property rights (IPR)
- Video games and multimedia applications
- Sustainable energy
- Anti-money laundering

Recent trends in cryptocurrencies

Cryptocurrency trading is seen as extremely lucrative, particularly among the younger generation, due to the large potential for profit. There are numerous limits and rules in traditional stock market trading. In the case of cryptocurrencies, there are no such boundaries and huge profits can be made overnight. The cryptocurrency sector is also known as the 'crypto market', in which 'crypto users' trade various types of cryptocurrencies.
