

Figure 4: Demonstration of blockchain working on distributed nodes

legitimate. The previous hash value, the new transaction block and a nonce are combined to form each new hash value. The number of leading zeroes required in the hash output determines the hash cash difficulty factor. The difficulty is adjusted so that block production remains constant at approximately 1 block every 10 minutes. The more

difficult it is to alter the blockchain, the tougher it is to overwrite the blockchain and double spend coins.

Blockchain technology is widely accepted by a variety of businesses. It has opened up a plethora of opportunities in the areas of healthcare, finance, accountancy and the online marketplace. The adoption of blockchain technology is expected to grow manifold in the coming years, offering quite a wide range of jobs for young aspirants. **END**

Table 3: Top decentralised exchanges and platforms

Decentralised platform	Coins in trading
Uniswap (v3)	400
PancakeSwap (v2)	1382
Uniswap (v2)	2308
1inch	324
Sushiswap	412
Curve Finance	23
Quickswap	140
WaultSwap	32
DODO	18
JustSwap	41
Aave	17
Compound Finance	12
WaultSwap Polygon	13
Bancor Network	156
Balancer (v2)	22
Synthetix Exchange	29
Terraswap	19
Balancer (v1)	173

Decentralised exchanges and wallets

Decentralised exchanges are platforms on which the account is opened directly without any intermediate company, and trading is done directly by the crypto users. There are some misgivings about such platforms because of the anonymity of the people who use them.

Table 3 lists the world's top decentralised platforms that offer crypto trading.

The jury is out on the use of cryptocurrencies because these are

sometimes used to circumvent the national money transfer system. Some governments prohibit their use in order to prevent money laundering.

The use of cryptocurrencies in any country necessitates legislation and protocols in order to incorporate the greatest benefits and features into a real-world setting. If cryptocurrencies are employed for real-time applications and e-governance, the benefits to society and the corporate sector can be enormous. **END**
