

“This portal is going to help everyone in the industry trying to build new innovative products”

India has been ramping up its efforts to emerge as a leading contributor to the global electronics ecosystem. The government of India has announced a slew of policies and initiatives to make India self-reliant in the field of electronics. One such initiative is called I-STEM, which aims to support and accelerate the growth of tech startups. The **Electronics For You team** spoke to **Dr Sanjeev Kumar Shrivastava, COO and National Coordinator at I-STEM**, to understand how he and his team are trying to create a game-changer for electronics and tech startups. Here's what we discovered.

Dr Sanjeev Kumar Shrivastava
COO and National Coordinator,
I-STEM
