

“Product-led bottom-up growth is now seen as the most efficient way to seed and acquire new users”

Mike Anand, chief marketing officer, Redis, speaks with OSFY's Abbinaya Kuzhanthaivel about the popularity of the company's open source products and the growth of the Indian market. Among other things, he also talks about the new governance model the company has adopted. Some excerpts from the conversation...

Mike Anand,
chief marketing officer,
Redis

Q. How important is India for Redis?

A. India is one of our fastest growing markets. We have been investing in the Indian market for a little over two years and have steadily increased our investments. We held one of our largest Redis Day events at Bengaluru in January 2020 with over 600 attendees. We have a wide range of customers in India including Freshworks, matrimony.com, SonyLIV and MyTeam11. For example, Freshworks relies on Redis Enterprise Cloud to run at least 67 services, which round off to around 30 million to 500 million requests per day.

It does feel like India has accelerated directly to the cloud and open source movement, skipping the whole on-premises software era. The customer base is in a growing phase, and the market here is quite great. Whenever we host an event, even our global user conference based in the US, we get a tremendous, remote response from our community in India.

We are expanding our local sales, solution architects, and customer support teams due to the popularity of the cloud in the country, be it individual developers or large enterprises. Because of this, we are seeing a lot of

innovation across the Indian market, and are always looking out for talented individuals locally as we are growing not only in India, but also throughout Asia and Oceania.

Q. Who is the community leader at Redis?

A. We have focused over the past year to make Redis a community-driven open source project since its creator, Salvatore Sanfillippo, stepped back as lead maintainer. Salvatore managed Redis for more than 11 years before transitioning the management to a core team of long-time contributors to the
