

Azure Boards	Agile is a set of principles that brings pace to development and delivery while DevOps practices make sure that this pace is maintained. Scrum is one of the most popular Agile based frameworks. Continuous planning practice in the organisation helps to achieve visibility, collaboration and communication, feedback, and velocity. Azure Boards service helps to manage projects that use Scrum and Kanban with customisable dashboards, and integrated reporting. It helps to track user stories, backlog items, tasks, features, and bugs.
Azure Repos	Azure Repos provides Git or Team Foundation Source Control as your Git version. • Support for pull requests • Support for branch policies – gated check in We can connect to Azure Repos to access repositories and manage work using the command line, Visual Studio Code, Visual Studio, Xcode, Eclipse, and IntelliJ.
Pipelines 1. Build pipelines 2. Release pipelines	Build and Release pipelines are for CICD implementation using tasks in UI or YAML scripts that reside in <i>azure-pipelines.yaml</i> • These help to automate different tasks with proper approvals, triggers, and quality gates • Publish unit tests results • Code coverage • Build quality verification • Publish artifacts such as WAR or JAR files For private projects, up to 1800 minutes (30 hours) of pipeline jobs are free every month for execution. Windows, Linux, or Mac machines are available for Build. For more details on Microsoft-hosted agents, you can visit https://docs.microsoft.com/en-us/azure/devops/pipelines/agents/hosted
Azure Test Plans	Azure DevOps and TFS (Team Foundation Server) provide support for the following types of testing for better quality and effective collaboration: • Planned manual testing • User acceptance testing • Exploratory testing • Stakeholder feedback
Azure Artifacts	Azure Artifacts provides features to create and share package feeds for Maven, npm, and NuGet packages. It is pre-installed in Azure DevOps Services, Azure DevOps Server 2019 and 2020. and Team Foundation Server (TFS) 2017 and 2018.
Extensions Marketplace	Visit https://marketplace.visualstudio.com/azuredevops to get more details on the support for Extensions for Azure DevOps.

Table 2: Azure DevOps services

Feature	Azure DevOps Services	Azure DevOps Server
NuGet	Yes	Yes
npm	Yes	Yes
NuGet.org upstream source	Yes	Yes
Maven	Yes	Yes
Maven Central upstream source	Yes	Azure DevOps Server 2019 Update 1 and newer, Azure DevOps Server 2020
Python	Yes	Azure DevOps Server 2019 Update 1 and newer, Azure DevOps Server 2020
Universal Packages	Yes	No
