

Figure 1: Azure DevOps Demo Generator

Figure 2: Azure DevOps project

1. Go to <https://azuredevopsdemogenerator.azurewebsites.net/>
2. Click on *Choose Template*.
3. Select the Java based template, which is *MyShuttle*.
4. Provide a *New Project Name* and select *Organisation*. Click on *Create Project*.
5. Go to <https://dev.azure.com/>, log in with your credentials if you have already created them, and go to the newly created project.
6. Go to the *Dashboard* in the left sidebar and explore all the possibilities to configure it.
7. Verify the *Backlogs*, as shown in Figure 3.
8. Once you are done with *Backlogs*, verify the *Repository*.
9. Next, to configure your pipeline, we need to go to *Pipelines* -> *New Pipeline* -> *Select location of your code in 'Where is your code?' section (Azure Repos Git)* -> *Select a repository* -> *Select Starter Pipeline*. The code is given below.

Starter pipeline
