

10. Click on *Run* in the *Run pipeline* dialog box, select the branch/tag and again click on *Run*.
 11. Next, click on *Stage* and you will be directed to Pipeline logs runtime.
 12. Wait until the Pipeline is completed.
 13. Verify the *Stage* results, as shown in Figure 5.
 14. Verify the status of unit tests, code coverage results and quality checks, as shown in Figures 6, 7 and 8.
 15. Verify Artifacts, which provide package files as well as different reports.
- Once you have verified everything, you can make out that you are done with the process.
