

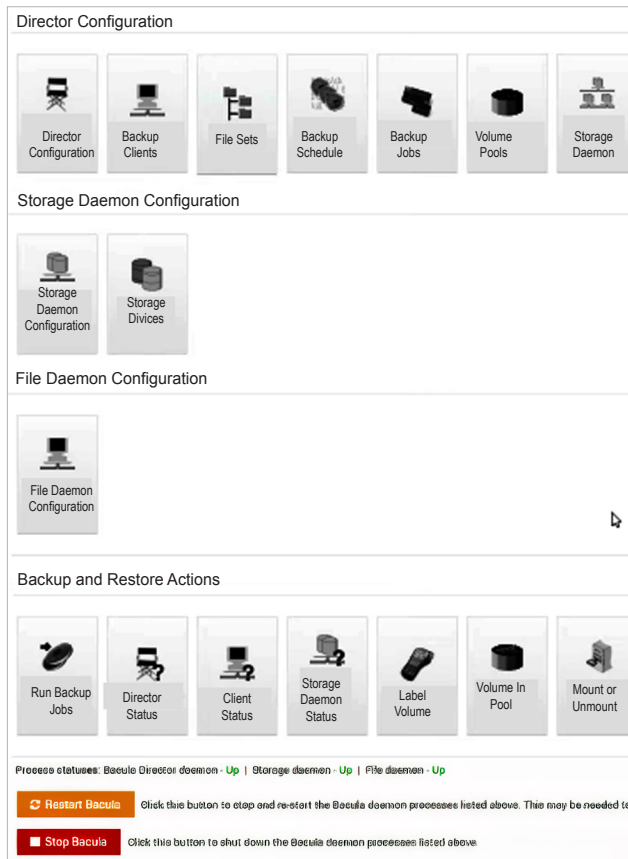

Figure 7: Bacula backup GUI

Now run the following command:

```
uwf allow 10000
```

Once that is done, you need to SSH into your local host at port 10000 and you will find all your backed up files there. You can run the following command:

```
ssh -L 10000:localhost -N -F root@ipadress
```

Then go to the browser and enter:

```
localhost:10000
```

You will find the backed up files there, as shown in Figure 7.

The backup GUI shown in Figure 7 gives you all the power to backup and manage it. This is a very basic setup, which will allow you to understand how the system works. You can go through the documentation and manuals at <https://www.bacula.org> for understanding Bacula further.
