The good thing about Kafka is that it can be scaled horizontally to support a large number of buses and millions of messages as long as the cluster is designed appropriately.

 By: Krishna Mohan Koyya

The author is a technology consultant based in Bengaluru. He has delivered more than 500 programmes to corporate clients on design and architecture in the past 12 years. Prior to that, he held various positions in the industry and academia for a decade.

Beyond messaging

More than 80 per cent of the Fortune 100 companies are using Kafka, according to its website. It is deployed across many industry verticals like financial services, entertainment, etc. Though Apache Kafka started its journey as a simple messaging service, it has propelled itself into the Big Data ecosystem with industry-level stream processing capabilities. For the enterprises that prefer a managed solution, Confluent offers a cloud based Apache Kafka service for a subscription fee. **END**
