

# YOU SAID IT

## The most informative magazine

I am a regular reader of OSFY. I have tried many tech magazines but none of them are as informative and useful as yours. I liked the article 'The Way FreeBSD Jails Work' published in the February issue of OSFY.

Could I request you to carry an article on tape drives in your 'Buyer's Guide' section? And last of all, I would like to congratulate your team for such a tremendous effort in making this magazine so useful to us.

I would also like to give a big thumbs up to your magazine's distribution team for ensuring that I get my monthly issue on time.

**ED:** Thanks a lot for the feedback. It feels great when readers tell us how they benefited from our magazine. We will convey your feedback to the author of the article on 'The Way FreeBSD Jails Work'. We will surely try and implement your suggestion and come up with a 'Buyer's Guide' on tape drives.

Our magazine's circulation and distribution team will be more than happy to get a pat on the back for their efforts. Keep sharing your feedback with us.

## A request to feature Gridway

I am a regular reader of OSFY (and earlier of LFY) for the past three years. I must tell you that LFY was the reason I made a complete switch to open source. I wish that you would have a special feature about how to implement grid computing in Gridway. I would also appreciate it if you could feature an article

on how to configure the Globus toolkit. Thanks a lot and keep up the good work

**ED:** Thanks a lot for the feedback. We cherish our readers' views and with every edition, we try to bring out a better product. It really makes us feel good to know that OSFY (or rather, LFY) was instrumental in your switching to open source. It's true that we have not covered grid computing recently. Do keep reading the magazine, as we are trying to focus more on such topics. Feel free to continue sending us your feedback.

## In appreciation of the article on Hadoop

It's been an amazing experience following OSFY and I am very thankful to the OSFY team. Each and every topic published has its own advantages but the article on Hadoop (in the March 2015 edition of OSFY) truly enlightened me enough to be able to work on multi-node Hadoop clusters. Keep posting more about Hadoop and HPC in forthcoming issues, too.

Thanks and regards,

—Tapas Sen,
