

Table 2: Comparison of OpenShift, Heroku and CloudFoundry

	OpenShift	Heroku	CloudFoundry
Type	PaaS, Web development	Subsidiary, PaaS	PaaS
Website	openshift.com	heroku.com	cloudfoundry.org
License	Apache License 2.0	Proprietary	Apache License 2.0
Written in	Ruby	-	Ruby, Go
Developers	Red Hat	Salesforce.com	VMware Pivotal Software
Development status	Released	Released	Released
Status	Production	Production	Production
Scaling supported	Horizontal, vertical, auto scaling	Horizontal, vertical	Horizontal, vertical
Deployment style	Public PaaS	Public PaaS	Private PaaS
Supported runtimes	Java, Node, Perl, PHP, Python, Ruby	Clojure, Groovy, Java, Node, PHP, Python, Ruby, Scala	Go, Groovy, Java, Node, Ruby, Scala
Supported frameworks	Django, Flask, Drupal, Rails, Switchyard, Vert.x	Django, Flask, Grails, Play, Rails	Grails, Play, Rails, Sinatra, Spring
Supported services	Jenkins, MongoDB, Mysql, OpenShift Metrics, Pgrounting, Postgis, Postgresql	Postgresql	-

Figure 9: Jenkins dashboard

Jenkins on OpenShift

Jenkins is an open source continuous integration server that is a vital part of the DevOps culture. The Jenkins app is provided by OpenShift Online. Select Jenkins from the application types available. Give the public URL for your Jenkins server.

Click on *Create application*, and then click on *Visit app* in the browser.

Access Jenkins in the Web browser. Log in with the credentials provided in the OpenShift dashboard. Figure 9 shows the Jenkins dashboard.

Tomcat on OpenShift

Tomcat is an open source Web server developed by the Apache Software Foundation. Select Tomcat as the type of application from the OpenShift Online dashboard.

View Tomcat related information and its status on the OpenShift Online dashboard. Visit and verify the Tomcat server in the browser.

OpenShift dashboard

OpenShift Online supports three free applications. After

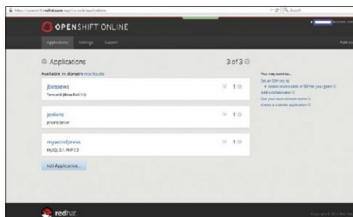

Figure 10: OpenShift Online dashboard

creating these three applications, verify the OpenShift Online dashboard. **END**
