

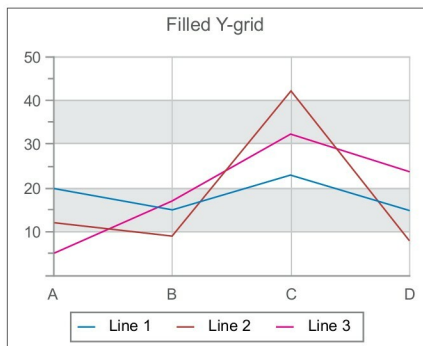

Figure 2: Line graph generated by JpGraph library

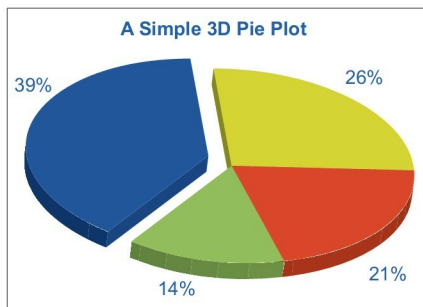

Figure 3: 3D pie plot generated by JpGraph library

```
$graph->xgrid->SetColor('#E3E3E3');
```

```
>
```

```
// Create the first line
$sp1 = new LinePlot($datay1);
$graph->Add($sp1);
$sp1->SetColor("#6495ED");
$sp1->SetLegend('Line 1');
```

```
// Create the second line
$sp2 = new LinePlot($datay2);
$graph->Add($sp2);
$sp2->SetColor("#B22222");
$sp2->SetLegend('Line 2');
```

```
// Create the third line
```

```
$sp3 = new LinePlot($datay3);
$graph->Add($sp3);
$sp3->SetColor("#FF1493");
$sp3->SetLegend('Line 3');

$graph->legend->SetFrameWeight(1);
```

```
// Output line
$graph->Stroke();
?>
```

To create pie graphs with this library, type:

```
<?php // content="text/plain; charset=utf-8"
require_once ('jpgraph/jpgraph.php');
require_once ('jpgraph/jpgraph_pie.php');
require_once ('jpgraph/jpgraph_pie3d.php');
```

```
// Some data
$data = array(40, 60, 21, 33);
```

```
// Create the Pie Graph.
$graph = new PieGraph(350, 250);

$theme_class = new VividTheme;
$graph->SetTheme($theme_class);

// Set A title for the plot
$graph->title->Set("A Simple 3D Pie Plot");
```

```
// Create
$sp1 = new PiePlot3D($data);
$graph->Add($sp1);

$sp1->ShowBorder();
$sp1->SetColor('black');
$sp1->ExplodeSlice(1);
$graph->Stroke();
```

```
>
```

Figure 3 gives the output of the pie plot generated by the JpGraph library.
