

YOU SAID IT

A few requests

I would like to make a few requests. Could you add more Linux distro reviews and tutorials, which will really be helpful for every Linux user? For example, you could review the upcoming bq Aquaris Ubuntu phone or MEIZU phone, or review the Ubuntu Touch operating system too. That should be impressive! A detailed review of the Jolla smartphone, which you introduced in the last edition of OSFY, would also be welcome. Thanking you in advance, with the hope that I can read these in upcoming editions!

ED: Thank you for writing in to us. Such feedback really does help us to improve the quality of our content. We agree that such reviews will be interesting for readers. We are working on creating a pool of authors who can provide us with unbiased reviews. So you can expect to see such articles soon, though not in the next edition. Feel free to get back to us with any other suggestions or feedback.

Some suggestions and a request for Arch Linux

I have subscribed to OSFY for the last one-and-a-half years. I love reading your magazine. Can you please publish articles on Docker, Vagrant and hosting the Python Flask-based Web application? Also, could you please bundle Arch Linux Live on the DVD of the month.

—Ankith Herle,
ankithherle@gmail.com

ED: Thanks! It's great to hear that you love reading our magazine. We have covered Docker in the August 2014 edition of OSFY. The other topics that you have suggested will surely be covered in one of the coming issues. We have not bundled the latest version of Arch Linux but will do so soon. Keep reading OSFY!

Feedback on 'Constant Pointers and Pointers to Constant'

I'm a FOSS enthusiast and have been reading OSFY since the LINUX For You days. I would like to share my comments on the

article, 'Constant Pointers and Pointers to Constant: A Subtle difference in C Programming' that appeared in the December 2014 issue of OSFY.

While I do appreciate the fact that the article sheds light on this concept, there is a mistake (may be typo?) on Page 40. In Illustration 3 on Page 40, Line 10, the pointer declaration should have been 'int* const ptr' because the code snippet is supposed to illustrate 'constant pointer'.

Wish to see more interesting technical topics being covered, especially on embedded Linux, in future issues of OSFY.

And keep up the good work!

—Anil Sasidharan,
anilvpr@gmail.com

ED: Thanks for your appreciation. Such feedback really helps us to improve the quality of our content. We will take care that our eyes don't miss such minor mistakes in future. We agree that embedded Linux is an interesting topic for readers and have carried articles on it in OSFY. In September 2014, there was an article on the Contiki OS, the operating system for IoT. You can refer to the link <http://www.opensourceforu.com/?s=embedded> for more such articles. Feel free to get back to us with any other suggestions or feedback.

A thumbs-up for Ubuntu MATE

I am an OSFY subscriber and FOSS enthusiast. I loved the DVD bundled with the December 2014 issue of OSFY. Thank you for including Ubuntu Mate 14.04.1. It is a great OS. I was wondering if you could ship a copy of Linux Mint 17.1 'Rebecca', the new Evolve OS and Google's Chrome OS in any of your future DVDs. Looking forward to a new thrilling copy of OSFY!

—Brijesh K R,
avtrkrb@gmail.com

ED: Thank you for writing in to us. We are glad that the distro bundled with the December DVD was useful. We have already bundled most versions of Linux Mint, so be assured that the latest edition too will feature in one of the future issues of OSFY.
