

Figure 4: Database replication

Figure 5: Database replication using Futon

```
# curl -X POST http://127.0.0.1:5984/_replicate \
-H "Content-Type: application/json" \
-d \
'{
  "source": "http://<DB-HOST-1_IP_ADDRESS>:5984/db-01",
  "target": "http://<DB-HOST-2_IP_ADDRESS>:5984/db-02",
  "continuous": true
}'
```

Note: You can inspect the status of the replication process by running the `_active_tasks` interface as shown:
`# curl -X GET http://127.0.0.1:5984/_active_tasks`

To test if the replication is a success or not, simply try to create a document in the `db-01` database. You should see the

document created and listed in the `db-02` database as well.

Replication can also be triggered using the Futon Web interface. From the Futon dashboard, select the 'Replicator' option from the right-hand side 'Tools' tab as shown in Figure 5. This will display the Replicator wizard, using which you can easily set up and configure a replication process between two CouchDB instances on the same host or on different hosts.

To start the replication process, select the 'Replicate' button as shown in Figure 5. You can monitor the status of the replication process from the 'Status' option located under the 'Tools' bar.

So here's a quick recap. In this article, we have looked at the many features and benefits of using NoSQL databases. We also learnt how to get started with Apache CouchDB, creating and populating simple databases as well as performing basic operations such as replication. This, though, is just the tip of the iceberg when it comes to what CouchDB can do. You can design your Web or mobile apps around CouchDB, leverage JavaScript to design and build MapReduce functions, query large datasets and much more!

OSFY Magazine Attractions During 2015-16

MONTH	THEME	BUYERS' GUIDE
March 2015	Open Source Firewall and Network security	SSD for Servers
April 2015	Web Development	Network Switches
May 2015	Virtualisation (containers)	Wireless Routers for SME
June 2015	Open source Databases	PaaS Solution
July 2015	Network Monitoring	MFD Printers for SMEs
August 2015	Mobile App Development	Hosting Solutions
September 2015	Backup and Data Storage	External HDD
October 2015	Mobile App Development	IaaS Solution
November 2015	Cloud Special	Firewall and UTM's
December 2015	Open Source on Windows	Online Backup solutions
January 2016	Android Special	Wifi Hotspot Devices
February 2016	Top 10 of Everything	External Storage
