

```
$ sudo python distribute_setup.py
$ easy_install pip
```

To install or upgrade to the latest released version of *couchdbkit*, type:

```
$ pip install couchdbkit
```

To program with *couchdbkit*, type the following code:

```
from couchdbkit import Server
myserver = Server()
db = myserver.create_db("couchdbkit_test")
db['myid'] = { 'x': 'Hello' }
doc = db['myid']
```

To map a CouchDB object to a Python object easily with a dynamic schema, type:

```
from couchdbkit import Document
class WelcomeNote(Document):
    author = StringProperty()
    content = StringProperty()
    date = DateTimeProperty()
```

```
WelcomeNote = WelcomeNote()
WelcomeNote.author = "AuthorName"
WelcomeNote.homepage = "http://couchdbkit.org"
```

Once this is done, the first CouchDB document will be shown as:

```
import datetime
from couchdbkit import *
class WelcomeNote(Document):
    author = StringProperty()
    content = StringProperty()
    date = DateTimeProperty()
```

Here is the code to save a *WelcomeNote* on the '*WelcomeNote*' database. Let's also look at how to create a database.

```
server = Server()
db = server.get_or_create_db("WelcomeNote")
WelcomeNote.set_db(db)
WelcomeNote = WelcomeNote
(
    author="AuthorName",
    content="Welcome",
    date=datetime.datetime.utcnow()
) WelcomeNote.save()
```

Research areas and scope of project work in CouchDB and Python

There is huge scope for research in the domain of Big Data analytics. There are libraries available in Python for interfacing with Twitter, Facebook and other social media applications. Research scholars, academicians and practitioners can work on the following research topics:

- Classification and prediction of live social media tweets
- Analysis and prediction of patterns from Twitter's followers' list
- Big Data analytics and rule mining in recommendation systems
- Solving 'cold start' problems by designing a unique recommendation system

There are a lot of other research topics in this field, based on which excellent and unique work can be done for grants and academic degrees. **END** 

By: Dr Gaurav Kumar and Amit Doegar

Dr Gaurav Kumar is the MD of Magma Research & Consultancy Pvt Ltd, Ambala. He is associated with a number of academic institutes, delivering lectures and conducting technical workshops on latest technologies and tools. Email: kumargauravin@gmail.com

Amit Doegar is assistant professor in the National Institute of Technical Teachers' Training and Research at Chandigarh. He can be contacted at amit@nittrchd.ac.in
