Help needed

I am working on my thesis for my master's degree. My aim is to ensure the quality of the ERP system. I am confused about what software to choose to accomplish that. I need some advice on this. Thank you, in advance.

—Nariman B, nariman.btn@gmail.com,

ED: It's great that you reached out to us. We would suggest that you try out the different features of the existing ERP. Also, it will be helpful if you can start learning the programming language that the ERP has been written in.

Haskell tutorials

I have been reading all your tutorials on Haskell, which have been very helpful. Thanks a lot. I had an issue with `haskell#postgresql-simple` that was published in the April issue of your magazine. You can find the issue at the Stack overflow (<http://stackoverflow.com/questions/29872728/haskell-postgresql-connect-parameter-is-not-a-query>).

ED: Thanks a lot for the feedback. It really makes us feel good to know that OSFY has been of help to you. We cherish our readers' views and with every edition, we try to evolve into a better product. Do keep writing in. Here is what the author of the article, Shakthi Kannan, has to say:

Hi Saravana,

You are welcome.

You need to include the `OverloadedStrings` extension in the code, as shown below:

```
(-# LANGUAGE OverloadedStrings #-)
import Database.PostgreSQL.Simple
main :: IO ()
main = do
```

Articles for developers

I am a regular reader of OSFY. It's a magazine that has helped

me a lot in understanding open source and its application. I am a developer by profession and love to read articles related to PHP, Perl or similar topics. I would like to request you to include more articles for developers.

ED: First of all, a big thank you for your words of appreciation. Through the years, we have constantly worked at improving the content, layout and design of the magazine in order to make your reading experience more enjoyable. As the readers of our magazine are both developers as well as systems administrators, we try to keep a balance while selecting topics and articles for the magazine. We have covered a lot and will certainly cover more new and exciting topics related to developers.
