

Samsung's Galaxy J1, a budget smartphone, is now available in India

Samsung has launched an all-new budget smartphone in India. Known as Samsung Galaxy J1, the smartphone will be available exclusively via e-retailer Amazon India across the country. Samsung Galaxy J1 comes with a 10.9cm (4.3 inch) WVGA display along with a 1.2GHz dual-core Cortex-A7 processor. The smartphone has 512MB of RAM and runs on Android 4.4 KitKat. It has 4GB of internal storage that can be expanded via a microSD card, FM radio and an 1850mAh battery. The Galaxy J1 is fitted with a 5MP auto-focus rear shooter with LED flash and a 2MP front camera.

The Samsung Galaxy J1 is poised to compete with smartphones like Moto E and Asus Zenfone 4 in the Indian market. Both the latter devices are available at a price less than Samsung's J1, which has comparatively better specifications, at least on paper.

Price: ₹ 7190

Panasonic's latest high speed multi-functional printers could enhance productivity

Panasonic India recently launched its multi-functional duplex printers. These versatile printers carry out routine print jobs with enhanced document security and offer on-the-go mobile printing. The printers target lucrative market segments such as hospitality, BFSI, real estate and helpdesks. The KX-MB2100 series of printers includes three new models—KX-MB2170, KX-MB2130 and KX-MB2120, priced at ₹ 20,700, ₹ 18,500 and ₹ 16,900, respectively.

The new solutions are unlike the conventional A4-sized multi-function printers that invert the pages one at a time, resulting in slow performance and poor productivity. With a memory of 64MB, these printers boast a speed of 24ppm with double-sided printing, along with the advantage of a 2-in-1 function that helps consume a quarter of the paper that is normally used and reduces toner usage. This range of printers is also compatible with Google, cloud print and mobile print applications, making these devices accessible from any electronic gadget. To combat threats to confidentiality, availability and integrity in business dialogues, the printers work on a password-secured basis. Panasonic India has also introduced its 'Genuine Toner' refill option for these machines.

Price: Starting from ₹ 16,900

HTC launches two variants of the Desire 526G+ online

HTC has launched its new smartphone Desire 526G+ in India in two variants—8GB and 16GB. While the 8GB model will be available via Snapdeal.com at a price of Rs 10,400, the 16GB HTC Desire 526G+ will be available for Rs 11,400.

The latest HTC smartphone sports an 11.9cm (4.7 inch) qHD (960 x 540 pixels) display offering a density of 234ppi. It runs on a 1.7GHz octa-core processor and is equipped with 1GB of RAM.

The 526G+ has an 8 megapixel rear camera and a 2 megapixel front-facing shooter. The company has added a 2000mAh battery to the smartphone, along with microSD card support. The connectivity options of the HTC Desire 526G+ are 3G support, Wi-Fi and Bluetooth 4.0. It runs on Android 4.4 KitKat and features the HTC Sense UI. The smartphone is poised to compete against the likes of Micromax Canvas Nitro A310 and the Yu Yureka.

Price: ₹ 10,400 and ₹ 11,400, respectively, for the 8GB and 16GB variants
