

```

jPlayer: "jquery_jplayer_1",
cssSelectorAncestor: "#jp_container_1"
}, [
{
  title:"Orchestra",
  artist:"Rozhdestvensky",
  mp3:"http://media.vad1.com/temporary_
url_20140405ksjrf/internationale-ru.mp3",
},
], {
  supplied: "webmv, ogv, m4v, oga, mp3",
  useStateClassSkin: true,
  autoBlur: false,
  smoothPlayBar: true,
  keyEnabled: true,
  audioFullScreen: true
});
});
[/]>
</script>

```

Customising the MP3 player (adding the theme-changer feature)

The following lines of code aim at customising the skin of the player by clicking on the button. The functions `randomNumber()` and `randomize()` allow users to pick up a random style sheet from a local collection and then pass it to the swap function. We have used a sample of three style sheets. The `randomNumber` function generates a random number between 0 to (len-1) where len equals 3 in our case.

```

function randomNumber(len) {
  return (Math.floor(Math.random() * (len -
0))) ;
}
function randomize(){
<!-- call random generator -->
var ind=randomNumber(3);
document.getElementById('cssstylesheet').
setAttribute('href', 'skins/'+ind+'/style.
css');}

```

Our player is now ready. The complete source code can be downloaded from https://github.com/VinayPatkar/JPlayer_Demo_GitHub. Enjoy a screenshot of our jPlayer (Figure 1).

The player demonstrated here presents only a glimpse of what jPlayer is capable of. There are many more customisations and event handling methods offered by jPlayer that can be explored by visiting <http://www.jplayer.org/latest/developer-guide/>. This link provides an in-depth comprehensive documentation of various jPlayer features and modules.
