

Figure 15: Setting up the cloud

Figure 16: Logging in to Hosted Scalr

Figure 17: Environment on Hosted Scalr

as the name, email, and password as shown in Figure 12.

Log in to the Scalr dashboard with the newly created account credentials. It will direct you to the account dashboard after login as shown in Figure 13.

Verify the default environment on the dashboard as shown in Figure 14.

Click on **Add Cloud Credentials** to set up the cloud as shown in Figure 15.

Hosted Scalr: A walk-through

Go to <http://www.scalr.com> and click on **Start Free Trial**. One can try Hosted Scalr for free for 30 days. Provide all the required details in the form and click on **Start Free Trial**. The password will be sent to the registered email address.

Go to <http://www.scalr.com/> and click on **Login**; then provide your email address and password to log in as shown in Figure 16.

This will open the account dashboard that will provide information related to billing, which includes details such as the plan, status and next charge cycle details. It also provides

Figure 18: Supported cloud platforms

	Scalr	RightScale	enStratus
Open Source	Yes	No	No
Website	http://www.scalr.com	http://www.rightscale.com	http://www.enstratus.com
Type	Cloud Management	Cloud Management, Cloud Analytics, Self-Service	Cloud Computing
License	Apache 2.0	SaaS	Proprietary
Cloud Support	OpenStack, Microsoft, Azure, Amazon EC2, Google Compute Engine, Rackspace Open Cloud, Nimbus, CloudStack, IDC Frontier, Enter Cloud Suite, VMware, Cisco, HP Helion, Nimbus	OpenStack, Apache CloudStack, Amazon Web Services, Microsoft Azure, Google Cloud Platform, Rackspace, IBM SoftLayer, VMware vSphere	OpenStack, Apache, CloudStack, Amazon Web Services, Microsoft Azure, Google Cloud Platform, Rackspace, IBM SoftLayer, VMware vSphere, VirtualStream, Joyent, SaaSMatrix, Digital Ocean
Infrastructure provisioning, configuring and monitoring	Yes	Yes	Yes
Management console for monitoring multiple clouds	Yes	Yes	Yes

Figure 19: A comparison of cloud management products

quick links for adding cloud credentials and the management of resources. One can create an environment and add cloud resources based on availability as shown in Figure 17.

The supported cloud platforms are indicated in Figure 18.

Figure 19 gives a comparison of the various cloud management products available.
