TP Link's fastest router launched in India

The global provider of networking products, TP Link, has recently launched its fastest dual band gigabit wireless router — the Archer D9.

The next-gen Wi-Fi router supports the 802.11ac standard. It comes with beam-forming technology that delivers a more targeted and highly efficient wireless connection with a 1GHz dual core processor to ensure uninterrupted simultaneous processing of multiple wireless and wired tasks.

The Archer D9 comes with USB 3.0 and USB 2.0 to share a printer locally, as well as sharing files or media with networked devices or remotely via a FTP server.

The features of the Archer D9 router are:

1. 1900 Mbps wireless speed
2. Three detachable external antennas and high power amplifiers for broad Wi-Fi coverage
3. Advanced beam-forming technology to enable a focussed Wi-Fi signal to connected devices
4. A shield on the internal components and Ethernet ports
5. Flexibility of different Internet connections including ADSL, cable or fibre, using its interchangeable LAN/WAN port.

OnePlus 2 released with fingerprint scanner

OnePlus, the Shenzhen based manufacturer, has recently launched its flagship smartphone, OnePlus 2 in India. This device is quite similar to its predecessor, OnePlus 1, which was launched last year. The OnePlus 2 features a 13.9cm (5.5 inch) 1080p screen and has a metallic finish. The smartphone is powered by a Qualcomm Snapdragon 810 processor and runs on Android Lollipop 5.1 with OnePlus's own Android-derived operating system, Oxygen 2.

The OnePlus 2 variant comes with 64GB of storage with 4GB of RAM. Its most hyped-about feature is the front-facing fingerprint sensor by which a user can unlock the device in a second. On the camera front, the OnePlus 2 is equipped with a 13 megapixel sensor with optical image stabilisation along with a 5 megapixel front camera. The OnePlus 2 has a powerful 3300mAh battery and is available with the company's classic 'sandstone black' back cover with four 'style-swap' covers called Bamboo, Black Apricot, Rosewood and Kevlar that are available on Amazon.in.

Portable power-packed speakers from Boat

Boat, a fashion and technology brand, has introduced its new wireless easy-to-carry portable speakers called Rugby, designed with state-of-art technology. The speakers are designed with a built-in microphone which enables it to capture and record sound.

The stylish speakers come with a 10-watt passive radiator and two drivers which add stereo and dynamic depth to the high performance audio system. The Rugby wireless portable speakers can amplify power up to 2 x 5 watts for a louder sound experience.

The easy-to-set-up speakers can be connected to multiple smartphones or tablets to play music. They are also equipped with an AUX input cable to connect headphones, smartphones and MP3 players. The portable speakers come with a 1800mAh rechargeable battery with up to 8 hours playback time. The Boat speakers are available via Flipkart in an affordable range.
