

A 3G enabled watchphone from Intex

Consumer durables and IT accessories company, Intex, has recently launched its all-in-one watchphone called the iRist.

The smartwatch runs on Android 4.4 Kitkat and comes with a 3G micro SIM slot which enables the user to make and receive calls with the device by simply pairing it with a Bluetooth headset.

The device features a 3.9cm (1.56 inch) 240 x 240 pixel screen that can display up to 16 million colours and has sapphire glass protection on top. It is powered by a 1.2GHz dual-core MediaTekMT 6572M chipset alongside 512MB RAM and 4GB internal storage and supports microSD cards up to 32GB.

The Intex iRist is the only smartwatch that features a 5MP camera, supports music via Bluetooth earphones along with Wi-Fi support and has a bigger 600mAh battery.

Some of the additional features of the smartwatch include:

- Inbuilt GPS
- Pedometer to keep a check on your health
- Dust and water resistant
- Syncs with smartphones enabling users to carry everything on a smartwatch
- Voice assistant

Apart from these features, the wearable comes with access to the Google Play store and the company claims many popular apps like Whatsapp and Twitter are already optimised for the watch's display.

The Intex iRist watchphone is available in three colours—black, pink and orange, from Ebay.in.

Bluetooth speakers with vintage look from ENRG

Lifestyle electronics company, ENRG, has recently introduced its 'vintage look' speaker named Jazz. The Bluetooth speaker is capable of taking you back to the era of transistor radios with its vintage looks. It occupies the least space, while offering great sound. It is suitable for indoor and outdoor use.

The portable speaker is made of a fine die-cast aluminium back frame in a light 'Miami bronze' colour and is styled with a classic leather belt-like holder attached to its top. The device is powered with Bluetooth 4.0 that enables the user to connect and play music within a maximum range of 10 meters from a sound system.

The vintage speaker is equipped with a rechargeable 3.7V 1800 mAh powered polymer lithium battery which lasts up to 12 hours when fully charged.

It has an inbuilt 3.5mm jack with power output of 10 watts (5W X 2) and a frequency range of 40Hz - 19KHz with a standard maximum volume output of 90db.

The ENRG Jazz Bluetooth speaker comes with an aux cable and microSD slot at the rear. It is available via Amazon.in and ShopClues.

Address: Amazon India, Brigade Gateway, 8th Floor, 26/1, Dr Rajkumar Road, Malleswaram(W), Bengaluru 560055; **Website:** www.amazon.in

ADATA's SSD with a silicon motion SM 2256 memory controller

One of the world's largest vendors of DRAM modules and USB flash drives, ADATA, has recently launched its premier SP550 solid state drive (SSD) that uses a triple-level cell (TLC) architecture.

It is the first ADATA drive to include the silicon motion Storage Management Initiative (SMI) SM 2256 controller which uses NANDXtend technology.

The SSD comes with features like data shaping, LDPC (Low Density Parity Check), ECC (ERP Central Component) and a RAID (Redundant Array of Inexpensive Disks) engine for enhanced data protection, stability, reliability and SLC caching technology to boost performance.

The SSD supposedly offers outstanding durability and a large capacity of 960GB. It supports SATA DevSlp (device sleep) low power mode that reduces the power used and hence lowers the energy bill, while providing a longer battery life. It comes with Acronis true image HD and ADATA toolbox software for easy data migration.

The ADATA SP550 SSD is available via retail and online stores.

Price: Approximately ₹ 5000
