

Figure 1: Creating a backup set

to run fwbackups, the following software dependencies have to be installed:

- gettext
- Python
- PyGTK (including Glade support)
- A Cron service such as Cronie, Vixie-cron or Dcron
- Pycrypto (or Python-crypto)
- Paramiko (or Python-paramiko)

#### Installation on Linux

- Ubuntu

In Ubuntu, the software dependencies mentioned above have to be installed in order to run fwbackups correctly. To install fwbackups from the source tarball, download it from <http://downloads.diffingo.com/fwbackups/fwbackups-1.43.4.tar.bz2>. Download the source code to the home directory. Now open a terminal session (select *Applications > System Tools > Terminal* or *Ctrl + Alt + T*). Then type the following commands:

```
sudo apt-get install gettext autotools-dev intltool python-
crypto python-paramiko python-gtk2 python-glade2 python-
notify cron
tar xvf fwbackups-1.43.4.tar.bz2
cd fwbackups-1.43.4
./configure --prefix=/usr
make && sudo make install
```

- Fedora

fwbackups is included in the Fedora Linux repositories. It can be installed from the *Add/Remove Software* utility.

#### Installing on Windows

Fwbackups for Windows can be downloaded from <http://downloads.diffingo.com/fwbackups/fwbackups-1.43.4-Setup.exe>.

Unlike Linux, the software dependencies on Windows

come bundled in with the fwbackups Windows installer.

## Using fwbackups

Setting a *scheduled backup* is easy with fwbackups' simple interface. The *Scheduled backup* feature automatically backs up files during the specified date and time mentioned while setting up the backup. The *Exclude file* feature excludes files which are not needed and thus saves a lot of space. The following steps will guide you through the basics of setting up a scheduled backup in the easiest way.

Any number of backup sets can be created, each could be either a recurring backup or one that is run once and not scheduled again.

### 1. Creating a backup set

Launch fwbackups and navigate to *Backup Sets* which is located on the toolbar. Then click on the *New Set* button on
