

You said it...

Kudos to the LFY DVD/CD team

I have been a subscriber of *LINUX For You* since its first edition. Since then I have been fondly collecting each issue of the magazine. I did not know much about Linux initially. But over time, by reading your magazine, along with some hands-on experience at my work place, I became a professional Linux developer in the embedded systems domain. I would like to thank LFY, which has indirectly been a great help in shaping my career. For sure, LFY is the best source of content related to Linux and open source.

I hope that some time in the near future I would be able to write for LFY about my own experiences with Linux and open source tools.

I have installed and used many Linux distros (like Fedora, Open SUSE, Debian and Ubuntu), but I rate the Ubuntu 10.04 Ultimate Edition, distributed with the LFY June 2010 issue, as the best OS.

ED: Thanks a lot for your words of appreciation. It is great to read feedback from an avid LFY reader. As regards contributing to the magazine, you are most welcome to share your experiences. More information on how to contribute to LFY can be obtained from our website at the following URL: <http://www.linuxforu.com/write-for-linux-for-you/>

I got enthralled when I installed the Ubuntu 10.04 Edition, which came bundled with *LINUX For You* this month. It is fantastic! Thanks for your selection. It was a great experience to run it on my computer, which is a Dell Inspiron 1545. I was thrilled at the DVD contents, which include every possible program that can excite and interest an enthusiast like me. Being fond of trying out new things, I install every available software that I lay my hands on. I recently tried the Windows 7 OS, but it was the Ubuntu experience that left me spellbound.

Many thanks to the Canonical team for coming out with a great OS like Ubuntu 10.04!

ED: It's great to discover that readers like you loved the DVD contents – that'll only motivate us to try and keep doing better.

Suggestions for DVD contents

I have been reading *LINUX For You* for a year and have found it very interesting. It covers a wide range of topics on FOSS, related to fields like systems administration, programming, etc. I also like the coding section, immensely—a subject that is currently being ignored in most other computer magazines. I was crazy about Linux the day I joined engineering and LFY has fuelled this interest. Hats off to the team and community behind LFY.

I also would like to make a suggestion. Every month you provide two DVDs containing various OSs. It would be beneficial if you gave readers certain FOSS tools like Octave, GNUCash, Graphviz, media players, etc. It would be interesting and will help in popularising FOSS

—Jyoti Prakash, jyoti.blogger@gmail.com

ED: Thanks a lot for the pat on the back and for your suggestion. We do try and include software modules on the accompanying disks, and will try to bundle in more such material in the future too. Do keep writing to us and help us make 'our' magazine, better and better!

Career guidance

I have completed an engineering course in Computer Science and I want to build a career with Linux, as a software developer. Could you tell me about the type of courses available?

—Shakti Singh Sisodiya, shakti33_singh@yahoo.co.in

ED: The LFY July 2010 edition has a story titled: 'Red Hat Or Novell: Which Certification Should You Opt For'. This may help you in finding answers to most of your career related queries. The article talks about popular certification courses available in the market, highlighting their strengths and weaknesses. It also includes the perspective from industry experts and young professionals who have either enrolled in these programmes or are already certified professionals. In fact, you may also want to read another article titled: 'Tech Companies Queuing Up For Open Source Professionals'. This story carries the recruiters' point of view with insight into their expectations from FOSS professionals; the skill-sets that are in demand in the technology industry, etc.

In case you face a difficulty in finding the magazine, you may send a request to buy a copy from our associates,
