INGRES VECTORWISE – BREAKTHROUGH ANALYTICAL DATABASE

DRAMATIC PERFORMANCE INCREASES OVER LEADING DATABASES FOR ANALYTICS/
REPORTING AND DRASTICALLY REDUCED COMPLEXITY FOR BI PROJECTS

"Game-changing technology" Don Feinberg, Gartner Group

"[we] built an initial table of some 20-40 Million rows with approximately 30 columns per row. With no attempts to tune the database, the simple SQL queries were very fast."

Warren Master, CIO, TRG Management, New York

"Ingres VectorWise performance has been outstanding and it was so easy to get up and running. Position analysis was 10 to 50 times faster than the leading commercial databases in our testing and with linear query performance from 12 million – 1.2 billion financial records. These are drastic improvements in terms of speed."

Steve Ferrando, CEO, dbConcert, New York
