

blink, its true) Mac. Well, that's the official compatibility list. I play it under OpenSolaris 2009.06 and it works smoothly enough, though the launch is a bit sluggish. To get the game, visit the site at www.urbanterror.info/news/home

Scorched 3D

This game is a remake of the DOS classic, Scorched Earth. It is a strategy game meant for Windows, Linux, BSD, Mac and other UNIX-based machines. It features online multi-player mode, superb artillery, and a plethora of characters and scenes. Sounds good? Get the game at www.scorched3d.co.uk.

Savage 2

In this FPS game, you are in control of several supernatural characters, and the goal is to kill the villains. Simple! The graphics are mind blowing, and you'll keep coming back to it again and again.

Recently, Savage 2 was sub-divided into two versions: *The Battle for Newerth* and *A Tortured Soul*. To download the game, visit the website at www.savage2.com. Be warned though: *A Tortured Soul* is not 100 per cent open source yet.

UFO Alien Invasion

This is a remake of the DOS game *UFO: Enemy Unknown*. It is a strategy game, in which you have to establish bases to train your troops and develop modern weaponry. The storyline is good, and the combat against aliens is well laid out and

quite detailed. The game-play is complex, and a beginner is sure to be left dazed at the sheer variety of game modes. The latest version is 2.3, and it can be downloaded from www.ufoai.sourceforge.net.

Want more? Try *Battle for Wesnoth*, *Lips of Suna*, *Project X* and *Forgotten Elements*. Who needs *Halo*? Still not satiated? Just visit the Linux Games Database at www.lgdb.org!

The bottom line

Recently, Electronic Arts, the gaming stalwart known for productions such as *Need For Speed* and *FIFA*, expressed the need for a true open source gaming ecosystem. That sums it up! FOSS seems to be the most plausible solution to address the ever-intense war between consoles and games. With the advent of FOSS in the gaming world, the end-gamers can surely expect a treat!
