

You said it...

Hats off to the 'Securing Apache' series!

 LFY's November issue was like a true Diwali dhamaka for me. I got to read Part-3 of the 'Securing Apache' series by Arpit Bajpai. Many thanks to you for publishing this series. The way CSRF was explained in this article is truly remarkable. After reading it, I found that many websites currently active on the Internet are actually vulnerable to CSRF and XSS attacks. I could never have imagined that hackers could work at such a deep level. I hope the Web developers take their cue from the article and follow the security tips given in it.

Thank you LFY for keeping us up-to-date about such techniques.

GREAT WORK!

—Akansha Jaswal, jaswal.akansha@rediffmail.com

 I recently read the article 'Securing Apache' written by Arpit Bajpai in the LFY November issue. It taught me about many facts related to CSRF that I was unaware of.

I am a freelance security practitioner myself. I will be very grateful if you can send me (or email me the link to) the pdfs of 'Securing Apache' Part 1 and Part 2 because, unfortunately, I do not have those issues of LFY.

I will be very obliged if you could send the pdfs as soon as possible.

—Akshat Baakliwal, akshat.baakliwal@hotmail.com

ED: Dear Akansha and Akshat, we are thrilled to know that you found the series on securing Apache, useful and interesting. Many thanks for your encouraging feedback!

Akshat, regarding the previous two issues of LFY that featured Part 1 and Part 2 of the series, you can purchase them by sending an email request to support@kitsnspares.com. The article will also shortly be published online, at www.linuxforu.com.

Addressing the problem of e-waste through LFY

 I have been a subscriber of *LINUX For You* for over four years now. I really like the content that you put together in the magazine. I also like the distributions/software you share via CD/DVDs. But recently, I realised that I had a lot of old CD/DVDs with me. For example, I have three versions of Knoppix, two versions of Mandriva, many versions of Fedora, etc. This may be a problem faced by many other readers as well. Although it is very useful to have the latest copy of the distribution, this also gives rise to a lot of electronic waste. Maybe your magazine could address this problem through an article on how to recycle old CD/DVDs or offer readers the option of subscribing to the magazine, without the CD/DVDs.

—Navneet Kataria, ennavneet@yahoo.com

ED: First of all, let me thank you for all the appreciation you have shown to the magazine. I am really glad that you like the contents, and I also value the support that you have extended to us.

Your point related to the e-waste generated by old and piled up CDs/DVDs is pertinent and quite thought provoking. As you may be aware, we have over 40,000 people following the magazine on Facebook and Twitter, so we could surely place this idea of yours on the *LINUX For You's* Facebook (www.facebook.com/LinuxForYou) and Twitter (<http://twitter.com/LinuxForYou>) pages and solicit everybody's thoughts on the subject. Since LFY is a community driven magazine, we are sure we will receive some interesting ideas on how to address this serious challenge of managing e-waste, whether generated through CDs/DVDs or obsolete IT equipment/gadgets.

Regarding Perl archives

 Hi! I love the regular columns *A Voyage To The Kernel* and *Code Sport* a lot. I must thank you for the archives that you bundled a couple of months back along with LFY, in response to requests from a few LFY readers. I would also like to make a request to the LFY team to compile and bundle some articles on Perl.

—Praveen M J, praveenmj34@gmail.com

ED: Thanks for your words of praise. As regards the articles based on Perl, our editorial team has taken note of the request. We hope to bundle Perl-related archives with the magazine soon. So do keep reading LFY!

Ubuntu 10.10 was fabulous!

 Ever since Ubuntu 10.10 was released, I have been trying to get a free CD from Shipit. Having exceeded my quota of free CDs, Shipit politely refused and asked me to download the ISO image. I was stuck because my Internet connection is lousy. But your November 2010 issue came as a great relief, packed with the latest Ubuntu distro DVD.

I must thank you for the prompt action your team takes to bundle the latest distros. That's why I always look forward to grabbing the latest edition of the magazine. Keep it up folks and accept all my appreciation and thanks!

—Dr S Parthasarathy, drpartha@gmail.com

ED: We are extremely encouraged by your kind words of appreciation and encouragement, apart from being glad that you found the November 2010 edition of Ubuntu useful. It is such feedback that motivates us to tirelessly identify and bundle the latest content that our readers can savour, with delight. Do keep writing in to share your valuable insights and suggestions with us.
