

To be the BEST Learn from the BEST!!!

For System Administrators

- RHCE Boot Camp - 10 Feb - 20 Feb'10
- RHCE Boot Camp - 10 Mar - 20 Mar'10
- RHCE Regular Batches - Call for Details
- RH 333 (Boot Camp) - 15 Feb - 20 Feb'10
- RH 333 (Boot Camp) - 15 Mar - 20 Mar'10
- RH 333 (Sunday only) - 14 Feb'10
- RH 429 (Boot Camp) - 22 Feb - 25 Feb'10
- RH 429 (Boot Camp) - 22 Mar - 25 Mar'10
- RH 429 (Saturday only) - 13 Feb'10
- RH 423 (Boot Camp) - 26 Feb - 4 Mar'10
- RH 423 (Sunday only) - 14 Feb'10
- OpenLDAP (Boot Camp) - 26 Mar - 30 Mar'10
- JBSS (Saturdays only) - 13 Mar'10

For Developers

- PHP Boot Camp - 15 Feb - 19 Feb'10
- PHP Boot Camp - 15 Mar - 19 Mar'10
- PHP Evening Batch - 22 Feb'10
- PostgreSQL - 26 Mar - 28 Mar'10
- Drupal - 19 Mar - 25 Mar'10
- Perl (Boot Camp) - 22 Feb - 25 Feb'10
- MySQL (Boot Camp) - 5 Mar - 7 Mar'10
- Python(Boot Camp) - 22 Mar - 25 Mar'10

"After thorough research for getting through the best place to be trained and certified for Redhat, I visited Fostering Linux, and I still consider myself lucky to be right on target. This is one place where you have a combo of everything, a friendly environment to learn, some of the best trainers I have met in my experience of about 5.5 years in IT field now."
Ashu Sethi
Senior Systems Administrator
MCSE, RHCE, PLCP, CyberLaw

RHCA Batches:
RH 436
RH 442
RH 401
1st & 2nd Week
of March'10

SCO M-37 II Floor, Old DLF Colony
Sector-14, Gurgaon 122 001, Haryana
Tel: +91-124-4268187 / 4080880
Email: info@fosteringlinux.com
Website: www.fl.keenable.com

```
allow unconfined_t ify_t : file { relabelto };
allow ify_t fs_t : filesystem { associate };
allow unconfined_t ify_t_file getattr;
```

```
#####Adding type transition rule #####
type_transition unconfined_t httpd_sys_content_t : file ify_t;
```

```
%%%%%%%%%%
```

Compile, and then load this module:

```
[vbg@vbg-work test-selinux]$ make
Compiling targeted test module
/usr/bin/checkmodule: loading policy configuration from tmp/test.tmp
/usr/bin/checkmodule: policy configuration loaded
/usr/bin/checkmodule: writing binary representation (version 10) to
tmp/test.mod
Creating targeted test.pp policy package
rm tmp/test.mod.fc tmp/test.mod
```

```
[root@vbg-work html]# semodule -u /home/vbg/test-selinux/test.pp
```

```
[root@vbg-work html]# semodule -i | grep test
test 1.1.3
```

Now that our module is loaded in the memory, let us check the effect by creating a new file under the `/var/www/html/` folder:

```
[root@vbg-work html]# touch /var/www/html/testfile.html
```

```
[root@vbg-work html]# ls -lZ /var/www/html/testfile.html
-rw-r--r-- root root unconfined_u:object_r:html_t:s0 /var/www/html/testfile.html
[root@vbg-work html]#
```

Wow! It works. Now any files created in the `/var/www/html/` folder will be of the type `html_t`. It is left as an exercise to the reader to ensure that the default contexts of all files created in `/var/www/html/` should be set to `html_t` so that `restorecon` will set the correct type (`html_t`). Hint: modify the `test.fc` file with some regular expressions.

In the next article, we will further explore type transition rules, but from the viewpoint of running processes. We will also start exploring macros and their uses. Do feel free to drop me a mail, if you face any issues while playing around with SELinux. **END**
