Study says that 85-90% of users in an organization use a mail server for sending & receiving mails. Only 15% of users make use of additional features like calendaring, tasks, workflow and other strategic uses.

Emergic HybridMessaging (EHM) seamlessly Integrates/Co-exists with your MS Exchange / Lotus Server to offers Cost-Effective mailing to all, thereby saving huge amounts on expensive Exchange / Lotus Licenses.

Features & Benefits

- Low CAPEX & OPEX with less number of Exchange/Lotus CAL & Server licenses required.
- Optimum Utilization of costly resources by providing license to only those who actually use it.
- Calendar Sync with email client & mobile, Sharing with others & Scheduling within Linux based EMS.
- No end user changes required as mails can be accessed via Outlook Express or Thunderbird.
- ADS Authentication for single address book & centralized user management.
- Inbuilt features in Linux like Proxy server, IM chat server, AntiVirus, WebMail & Firewall.
