

Now it is all about decorating the wallpaper with the handful of brushes that come in the pack. You can also use your own style while creating simple yet subtle effects. Before we get started, let's divide the wallpaper in two parts: one is in front of the girl (your right-hand side), and the other behind the girl (your left-hand side). During the course of the article, we will be populating the left side of the wallpaper more than the right side.

Step 9 Let's start by creating a new layer and naming it 'Vectors'. Now we will carry out all the necessary cosmetic adjustments in this layer itself. Grab the "Vectorpack_VOL2_brushes_set_by_solenero73.abr-012" brush and set the scale to 1.40. Apply the brush just a little, above the corners, making sure some of it is partly hidden in the bubbles that we created earlier.

On to the left part: select the "Vectorpack_VOL2_brushes_set_by_solenero73.abr-006" brush, and set the scale to 1.2. Apply it somewhat near the 'left of centre' of the wallpaper, as shown in the figure.

Before we get into serious customisation, we will first create two big circles. Switch to the left side of the wallpaper. Select the "Vector_Download.abr-019" brush and scale it to 2.5. Apply it as shown in the figure. Now grab the "Vectorpack_VOL2_brushes_set_by_solenero73.abr-007" brush, and reduce the scale to 1.9. Apply the circle brush a little above, and to the right of, the circle we created above.

It's time for a makeover. The cosmetics only apply to the circle we just created. All you need to do is apply any brush that you like of a small scale varying from 0.5-0.9, around the edges of the circle.

Tip: Refrain from overdoing stuff in the smaller circle; instead, apply it in the nearby region. Do as much as you want with the bigger counterparts.

The last part is to decorate the top-centre position with something soothing. Select the "Vectorpack_VOL2_brushes_set_by_solenero73.abr-013" brush, with the scale set to 1.5. Apply it in the centre/top position.

We are done with the vectors wallpaper. Since there are lots of brushes in the pack, do not hesitate to try and develop something radical and funky-looking. This part is highly customisable, and you can churn out the best using your creativity; keep trying the Urban style, since it's quite in demand and appreciated all over. Till then, happy 'GIMPing'. **END**
