

CODECHEF

The CodeChef.com Challenge—your monthly dose of coding puzzles from India's biggest coding contest, now in print!

Hello and welcome to the CodeChef Puzzle Challenge sponsored by LINUX For You and Direct! Let's see how many of you can solve this month's puzzle, and find out which one of you will be amongst the three lucky winners of a cash prize of Rs 1000!

Last month's puzzle

What is the maximum number of pieces into which a circular cookie can be cut with 10 straight cuts? The cookie remains stationary while cutting, i.e., the pieces after making cut number X cannot be rearranged before making cut number $X+1$.

The solution

The maximum number of pieces into which a circular cookie can be cut with 10 straight cuts is 56.

How did we do it?

You need to make sure that every cut is such that it passes through each of the previous cuts. This way, the number of pieces is maximized.

And the winners for June are...

- Wallace Jacob
- Salvadesswaran P.S.
- Mayank Gupta

Puzzle for July

What are the total number of ways to get the following equation correct by inserting mathematical operators (+, -, /, *):
 $7\ 7\ 7\ 7 = 55$

Looking for a little extra cash?

Solve this month's CodeChef Challenge puzzle and send in your answer to codechef@efyindia.com or codechef@efyindia.com. Three lucky winners get Rs 1,000 in cash! 

About CodeChef: CodeChef.com is India's first, non-commercial, online programming competition, featuring monthly contests in more than 35 different programming languages. CodeChef has been created by Direct!, as a way to continuously challenge and engage the developer community. The goal is to provide a platform for practice, competition and improvement as well as enable developers to benchmark their skills against their peers. Log on to www.codechef.com for the July Challenge that takes place from July 1 to July 11, 2010, to win cash prizes up to Rs 55,000.
