ED: Thanks for the suggestion. Will surely do so, this issue onwards.

May 2010 'Developers Special'

I received my LFY author's copy today and I was stunned by the issue you people have put together. What a range and quality of the articles—from Go, udev, and grep, to instruction level parallelism, usb subsystem and libusb in Kernel segment, and all the others. Really the best 'Developers Special' among the technology magazines around—especially the open source ones in recent times. It shows where LFY is heading, and the tough times ahead for me as an author as I will have to compete very hard to keep LFY readers satisfied :)

Overall, a very good sign for the entire FOSS community.

— Ankur Kumar, ankuradoresfloss@gmail.com

ED: Ankur, thanks a ton for these words of encouragement. We will strive even harder to make the future editions even better. And, yes, not only you, but the entire LFY team will need to continue to work diligently towards making the magazine's content engrossing and informative for the readers.

Posting LFY columns, online

I am a new member of the LFY family. I recently read the May 2010 edition of the magazine. It covers vast areas of software fields. I really liked 'CodeSport' by Sandya Mannarswamy, 'A Voyage to the Kernel' by Aasis Vinayak PG, amongst others.

I would like to read all the articles carried so far under 'A Voyage to the Kernel' and 'CodeSport'.

Also, I am new to Linux. I really don't know how to install the software that you have provided in the CDs. Can you please suggest how I can install the same? Is there a link available where such information can be found?

Lastly, I wish all the success to LFY. Keep it up!!!

— Raghavendra Nayak, raghavbnayak@gmail.com

ED: Thanks for the feedback. As regards 'A Voyage to the Kernel' series, we are shortly uploading the section on linuxforu.com where a user after registering (free) can access the entire archive. Perhaps, we will do the same for CodeSport too.

As for installation guidance, kindly share your contact number with us, so that one of us can call you and help you with the installation process.
