

CODECHEF

The CodeChef.com Challenge—your monthly dose of coding puzzles from India's biggest coding contest, now in print!

*H*ello and welcome to the CodeChef Puzzle Challenge sponsored by LINUX For You and Directi! Let's see how many of you can solve this month's puzzle, and find out which one of you will be amongst the three lucky winners of a cash prize of Rs 1000!

Last month's puzzle

What is the maximum number of bishops that can be placed on a 1,000 x 1,000 chess board such that no bishop can attack any other bishop?

The solution

1998 bishops can be placed on a 1,000 x 1,000 chess board such that no bishop can attack any other bishop.

How did we do it?

You can place 'n' bishops on the leftmost flank and 'n-2' on the rightmost. Any other placement will give you a sub-optimal solution.

And the winners for May are...

- Manish Patil
- Adarsh H.D.
- Reuben Coutinho

Puzzle for June

What is the maximum number of pieces into which a circular cookie can be cut with 10 straight cuts? The cookie remains stationary while cutting, i.e., the pieces after making cut number X cannot be rearranged before making cut number X+1.

Looking for a little extra cash?

Solve this month's CodeChef Challenge puzzle and send in your answer to codechef@efyindia.com. Three lucky winners get Rs 1,000 in cash! 

About CodeChef: CodeChef.com is India's first, non-commercial, online programming competition, featuring monthly contests in more than 35 different programming languages. CodeChef has been created by Directi, as a way to continuously challenge and engage the developer community. The goal is to provide a platform for practice, competition and improvement as well as enable developers to benchmark their skills against their peers. Log on to www.codechef.com for the June Challenge that takes place from June 1 to June 11, 2010, to win cash prizes up to Rs 55,000.
