

```
su -c 'yum install flash-plugin nspluginwrapper.x86_64 \
nspluginwrapper.i686 alsa-plugins-pulseaudio.i686 \
libcurl.i686'
```

Next, I tried out the webcam integrated into my laptop. The 'Cheese webcam booth', the default application for taking pictures and recording videos, worked out-of-the-box. The default chat client for Fedora 13 is again Empathy (version 2.29.93), which has replaced Pidgin since Fedora 12. Empathy worked fine, and I could add different e-mail
