KNOPPIX is a compilation of GNU/Linux software that can completely run from CD. It automatically detects and supports most of the hardware. The CD can be used as a rescue system or for Linux demo and training.

How to use: Adjust the boot selection menu or computer's BIOS setup in order to boot from the CD/DVD Rom drive. Put the CD in the drive and boot your system and thereafter, everything else works (almost) automatically. For more tips and tricks you can refer to the Knoppix Cheatcodes available on this CD.
